Environmental awareness has risen in recent years. In order to maintain the sustainable development of our mother earth, powder coatings are the most effective and efficient selection in the coating market. Firstly, there is no solvent volatilization (VOC) problem during baking because powder coatings do not contain any solvents. They can reach the consequence of reducing carbon emissions. They do not require organic solvent recovery equipment and consumables. In addition, powder coatings are applied by electrostatic adsorption. With stable colors and high production efficiency, powder coatings are easy to coat thickly and required simple operation skills. Even when being used in large quantities, they can be recycled and added to save costs. Moreover, it is unnecessary to blend the solvents before operation. During operation, there is no pungent odor. Hence, there are certain guarantees for the health and safety of personnel.

近年來，環保意識抬頭，為了維持地球的永續發展，粉末塗料為塗裝市場中最有效能和效率的選擇。由於粉末塗料不含溶劑，烘烤時無溶劑揮發排放(VOC)的問題，可達到減少碳排放量的效果，也不需有機溶劑回收設備及耗材支出。同時，粉末塗料利用靜電吸附上粉，容易厚塗，操作技巧簡單、顏色穩定且生產效率高，甚至於大量使用時可以回收添加利用，降低成本。此外，粉末塗料操作前不需預調溶劑，且操作中無刺鼻氣味，對於人員健康及安全性有一定的保障。
